

Nova 200

bpt's new recessed, hands-free, colour audio/monitor station that can be inserted in the standardised rectangular embedding boxes. It can be framed with a standard cover plates. Being compatible with all other System 200 elements, it enables mixed installations to be created with audio-only handsets and twin-channel receivers (with the exception of the intercom versions). The Nova installation in table-top version is now possible with the NST/6 support use.

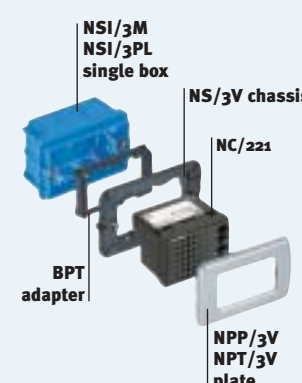

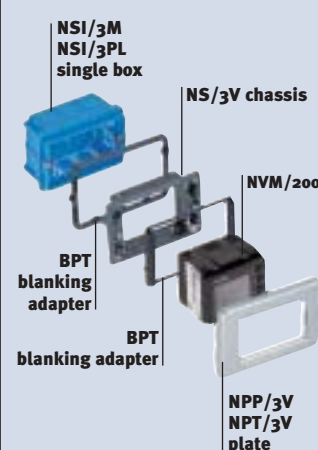

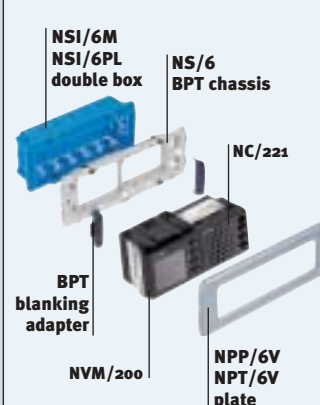

AUDIO MODULE PACK
